

# Campus Alert System

## Important Announcement from University Center

University Center (UC) is committed to providing a safe and secure environment to our students, faculty, staff, and visitors.

The South Dakota Board of Regents has launched a new emergency communications system. This new system will build on existing methods of information distribution and communication, and will greatly expand UC's ability to quickly and reliably communicate with students, staff, and faculty in an emergency.

The initial deployment of the new system will focus on emergency messaging. In a crisis, this mode of communication will serve as a reliable tool enabling UC to contact the entire campus community.

UC encourages everyone to sign up for this new emergency notification service, and also to become aware of practices already in place aimed at making the campus as safe and secure as possible.
